A suite of movie-making tools for teachers and students, that promotes engaging and collaborative learning

The full range of movie production tools; set design, character creation, direction, cameras & editing

- Intuitive click and explore game-style interface
- Immediate involvement with stock sets, characters and movies
- Massive library of animations and assets, catering for all ages and projects
- No animation or artist skills required to be creative
- Flexible customise options for props and characters and more
- Make it about you. Import options for full personalisation
- A suite of tools that encourages teamwork and fun
- Highly supportive community of amateurs and professionals
- Share lesson plans and movies with other teachers for FREE

Ideal for energising subjects and students in a medium that resonates with the YouTube Generation!

“

“I have found that the students are motivated not only by the movie lessons themselves but how the animations are made”

Paul Carr,
English teacher
Japan

“my students are now working their lunch breaks because they're so inspired!”

Steve Thorne
Media Studies
Long Road College

“For the serious budding movie maker, or anyone who's interested in how films are put together, it's hard to beat”

“Overall it's a triumph”
IT Reviews
(Recommended)

“We were impressed with the depth of Moviestorm”

“It allows any enthusiastic movie maker with a home PC to produce rich, atmospheric stories and then share them with friends”

Computer Active (4/5)

“Genuinely powerful movie-making capabilities; great for film students and film buffs; effective results; lively online community of fellow movie makers”

Personal Computer World (4/5)

MOVIESTORM

Education tools **for the YouTube Generation**

Join a growing community of educators using video as a new medium for teaching and learning

Moviestorm provides more than just a 3D animated video creation tool perfectly suited to support creative film and media courses up to Higher Education level. The package also enhances general teaching and learning, by providing access to a foundation of solutions, such as videos and lesson plans, created by teachers to share with other teachers and available for free!

The Moviestorm education forums contain a vibrant community of creative and innovative educators, where you can discuss the benefits of video as an educational tool and share ideas and solutions. To join in, go to www.moviestorm.net/forums/education (requires registration to participate).

Flexible License Options

Moviestorm Education products are available in a variety of simple 12 month licenses:

Individual License – Perfect for teachers to create finished movies that introduce subjects to learners

£50

Site Licenses – Make video creation part of the lesson, for schools and colleges at a variety of prices to suit your budgets

From £250 to £1000

Multi-Seat Licenses – Volume-based floating seat licenses to suit your university departmental needs

From £60 to £100 per seat

Home-use License – For your students to continue their video creation at home

£250 per institution for free access (based on 100 licenses)

Moviestorm 'Schools Edition'

The Moviestorm Education product is now also available on request as a Schools version, with content suitable for ages 13 and below, making the tool suitable for students of all ages.
